Requirement for the practical session

Practical session on Robust Inference using the Python Mystic framework for global optimization

➔ Possess a working PYTHON distribution.

We recommend you the use of the Spyder environment. A full distribution including Spyder is available at: https://python-xy.github.io/downloads.html

➔ Install the following packages:

- Mystic 0.3.1: https://pypi.org/project/mystic/#files

    Unzip the file, then open a Shell or command prompt inside the folder and write *'python setup.py install'*

    You can alternatively write *'pip install mystic'* for pip module users.

- PyDOE: https://pythonhosted.org/pyDOE/

    Unzip the file, then open a Shell or command prompt inside the folder and write *'python setup.py install'*

    You can alternatively write *'pip install pyDOE'* for pip module users.
